RESTRUCTURED SYLLABUS PROPOSED FOR B.A. HISTORY

Introduction

The proposed B.A. Programme in History has been designed in accordance with the National Education Policy and as per the guidelines provided by the Kerala State Higher Education Council that emphasizes on introduction of innovative and socially relevant courses at the graduate level. A workshop at two phases was conducted for preparing the Syllabus from 14th to 22nd May 2009. The Syllabus prepared is thoroughly restructured and reformed in accordance with the proposed changes in curriculum. Care has been taken to assure the quality of the syllabus of each course without compromising the details to be taught at the UG Level.

The draft proposal finalized in consultation with scholars, teachers and experts in Social Sciences, accords emphasis to (1) reorganization and redesign of curriculum (2) review of methods of instruction and evaluation, (3) inter-disciplinary approach and (4) social and practical relevance.

Objectives

1. To re-organise curriculum in traditional discipline of History so as to overcome the tedium of familiarity explicit in the conventional accounts given at the plus-two level.
2. To review the prevailing mode of instruction, evaluation and assessment.
3. To provide students with wider scope at graduate level itself in practically relevant and advanced areas of study and research.
4. To relate history discipline with practical needs and tasks.
5. To encourage multi-disciplinary approach.
6. To equip students with the capabilities to think, comprehend and present issues in the proper perspective.
7. To widen the optional parameters at graduate level.
8. To make students inquisitive and intellectually more sharp.
9. To give thrust on studying History subject as a process rather than an aggregate of finished state of affairs. It must be taught as a social science studying processes and human affairs in a developmental perspective. This requires a holistic approach opposed to the usual practice of dividing History into social political economic cultural and so on as independent facets.
10. The new approach opens up a terrain of knowledge much wider than what is given through the discipline based way of teaching and learning.

Nature

The proposed B.A. shall consist of 30 courses to be completed in 6 semesters. The undergraduate programme consists of 14 core courses, 10 common courses, 4 complementary courses and 3 open courses. The programme has integrated IT into the curriculum as a tool for effective learning and teaching. The revised programme has adopted a cafeteria approach enabling students choice of a number of options in each stream

Scope

The revised proposal based on multi-disciplinary approach would offer wide scope for students by familiarizing them with the latest developments in the subject of History making it practically relevant as a knowledge system.

The strong theoretical basis provides an undergraduate familiarity with the various issues and trends in the society at local, national and global level and gives access to proper methods of articulation and presentation in tune with the changing needs and requirements.

Above all the course shall offer unlimited opportunities to students in future for instance in higher studies, research, in the preparation of all competitive and related examinations.

A series of workshops and short duration refresher courses in this direction by the university board of studies with the help of social science experts shall make the teachers in the colleges realize the objectives of this programme.
