

NEP – 2020 AND EDUCATION OF DIFFERENTLY ABLED WEBINAR

The Importance of education for all children, especially for those with disabilities and with limited social and economic opportunities, is indisputable. Indeed, the inclusive education system allowed children with disabilities increased access to public education. Apart from that, the special education system has provided them an effective framework for their education. In spite of these advances however, many obstacles remain, including delays in providing services for children with disabilities, lack of permanent specially qualified teachers as well as regulatory and financial hindrances that complicate the program for all involved. At present Government of India declared the NEP 2020 and it is in the process of implementation. In these circumstances it is highly significant to discuss the education of differently abled in the context of the national education policy 2020. On behalf of the organizing Committee we invite you all to participate in the proposed webinar.

With Regards
