Specifications

The glove box with auto-moisture-purification system, which can provide an oilless, dry gas environment with moisture level lower than 1 ppm for research in materials science, chemistry, semiconductor, Li-ion cells and related industries. The glove box's cabinet forms a closed working environment with the gas purification system. The tank is filled with an inert gas (Nitrogen/ Argon) and circulated to remove the active material, so that the system maintains a high clean and high purity inert gas environment.
