

Summer Internship 2026

The MGU Innovation Foundation (MGUIF), the innovation ecosystem of Mahatma Gandhi University, has announced the launch of *MGU InternHub* for the 2026 batch, offering industry-aligned internship opportunities across emerging and high-demand domains.

The platform enables students to gain hands-on experience through structured internships that bridge the gap between classroom learning and industry requirements. Interns will benefit from live interaction with internship supervisors, real-time project exposure, and continuous mentoring support throughout the internship.

Students can earn 2 or 4 academic credits through internship durations of 120 hours and 240 hours respectively. The internships are offered in both hybrid and offline modes, providing flexibility and accessibility.

MGU InternHub offers opportunities across diverse domains such as Digital Banking Operations, Cyber Security and Ethical Hacking, Unity Game Development, Full Stack Development, Data Science with AI, and Advanced Drying Technologies, along with several other specialised fields.

Established in 2019 as a Section 8 company under the Companies Act, MGUIF functions as a Special Purpose Vehicle under the guidance of the RUSA 2.0 initiative of the Ministry of Education. The foundation is committed to fostering innovation, incubation and skill development in cutting-edge sectors.

The initiative aims to enhance students' employability by equipping them with industry-relevant skills and practical exposure, thereby preparing them for dynamic career opportunities.

Applications for the 2026 batch are open till 10th April 2026
